## ECOSYSTEM OF OSTİM

# DEPARTMENT OF ECONOMICS

---

Today's dynamic globalization processes require a challenging learning process, to choose from complex alternatives under certain constraints, even in the simplest decision-making stages in both business and country governance. In essence, the science of economics, which explores the conditions and ways of choosing the “best” among the complex alternatives, has become increasingly important all over the world in understanding all these processes.

OSTİM Technical University aims to provide added value at the national, regional and global level with its graduates in this basic discipline, thus contributing to national and global development.

# DEPARTMENT OF ECONOMICS

## MISSION

Department of Economics aims to provide experienced graduates with technical and analytical skills, who have the capacity to examine and question national and global economic developments with scientific methods, to follow and interpret the contemporary literature, to evaluate economic and financial problems objectively by producing solutions and who are capable of undertaking the middle and top administrative positions in the private and public sectors.

## VISION

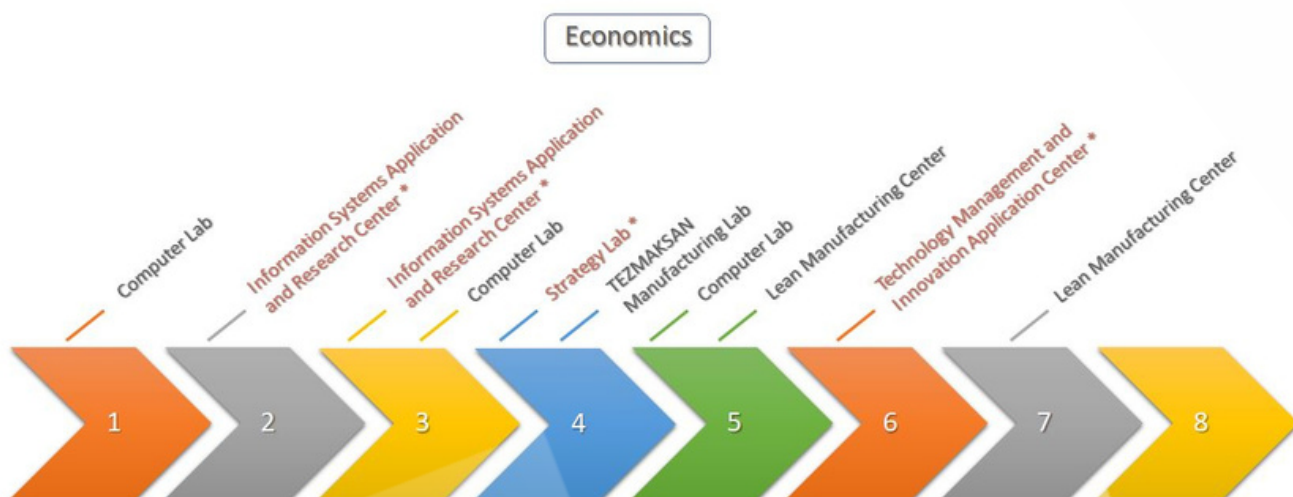

Through following changes and initiating change, our vision is to become a leading department, which is primarily preferred throughout the world with its quality of education, high quality scientific research and collaborations, and which has an effective role in the formation and implementation of economic policies and their operating principles globally and in Türkiye.

# ACADEMIC ACHIEVEMENTS OF OUR STUDENTS

OSTIM Technical University Economics program includes the courses of Microeconomics, Macroeconomics, Mathematics, Statistics, Econometrics, Economic History, Public Finance, Monetary Theory and Policy and International Economics courses within the scope of the basic fields of Economics. Workplace experience and entrepreneurship have a particular intensity in the program. Moreover, the Economics program offers a wide variety of elective courses. Many software packages and languages such as Gretl, R, EViews, Stata, OxMetrics and Python are used in compulsory courses such as Research Methods with Computer Applications, Statistics, Econometrics and elective courses such as Big Data and Economic Modelling.

Laboratory Usage by Semesters

# CONTRIBUTION TARGETS TO OUR COUNTRY AND THE WORLD

---

- To educate graduates who can easily adapt and participate in the speed of globalization, innovations, technological developments, think strategically and analytically and make decisions in this way, and are sought in national and international markets,
- To produce knowledge through quality scientific research in priority areas and to present original solutions for various problems by transferring this information to students, production areas and other segments of society,
- To develop country and region by producing original projects, ideas and products in the field,
- To produce solutions to social problems in cooperation with different segments of the society and to contribute to the social life of the society through social responsibility projects and cultural / artistic and sporting activities,
- To work as a part of the solution of financial and economic problems in the world in cooperation with international public-private institutions / organizations and non-governmental organizations, to take an active role in forming their policies on these issues,
- To contribute to the industry to produce high added value, to increase competitiveness and to guide the economic, technological, social and cultural development of our country,
- To enrich education and training principles and models in our country and in the world with innovative and creative approaches.

# COURSE FLOW CHART

## Economics Program Flow Chart – All Courses

# ADMISSION

---

Economics Department offers a four-year (eight-semester) bachelor's program. The placement of students in the program is conducted by the Assessment, Selection, and Placement Centre (OSYM). For foreign students, placement is determined after verifying the equivalence of their high school degrees and meeting other requirements specified in the higher education legislation, OSTIM Technical University regulations, and other relevant legislation. When necessary, OSTIM Technical University will establish its own selection and placement system for foreign students within the framework of the current legislation.

To be admitted to the department, students must fulfill the following requirements:

1. Complete the obligations related to tuition fees.
2. Not have any barriers in obtaining a student visa.
3. Submit the required documents to the university within the specified deadline.

# JOB OPPORTUNITIES

---

Economics graduates with a qualified education can be among the individuals sought by both the private sector and the public sector. With its curriculum, which is constantly adapted to global changes and its medium of instruction being in English, our graduates can easily find jobs in international institutions/organizations and companies.

The World Bank, International Monetary Fund (IMF), United Nations (UNDP, UNOPS, etc.), World Trade Organization, multinational companies and consultancy firms are some of them. Domestically, Central Bank, commercial banks, firms, ministries, non-governmental organizations, research institutions are the places where department graduates can frequently be employed
